EDUCATION

University of Illinois - Urbana-Champaign

Bachelor of Science in Computer Science and Anthropology, Minor in Creative Writing

Dec 2023

GPA: 3.94/4.00

EXPERIENCE

Microsoft

Mar 2024 – Present

Full Stack Software Engineer

- Implemented the majority of a large-scale authorization model migration, redesigning solution components and delivering frontend and backend changes across Angular JS, ASP.NET Core, and C# for a globally distributed service used by thousands of users, ensuring zero downtime via parallel support for legacy and modern authorization systems
- Migrated 89 services and applications to .NET 8, improving platform maintainability, security compliance, and long-term support readiness
- Led post-incident analysis and review for a production outage affecting thousands of users, presenting findings, root causes, and remediation plans to more than 100 engineering and business stakeholders
- Replaced 19 suites of Postman-based API tests with automated C# unit tests, improving maintainability and enabling deeper CI/CD validation
- Established production infrastructure for 2 new services, including CI/CD pipelines, centralized logging, metrics collection, alerting, on-call automation, and operational dashboards
- Strengthened security in various Azure resources by eliminating local authentication and enforcing centralized identity-based access controls
- Developed React and TypeScript user interfaces to enable advanced filtering across distributed API datasets, partnering with product and engineering stakeholders to deliver a production-facing home page used by thousands

Amazon Web Services

May 2023 – Aug 2023

Software Development Engineer Intern

- Developed an API to process and display information about 200+ AWS services across 99+ regions using Java, DynamoDB, API Gateway, Smithy, Lambda, and CloudFormation for customers to view this information in a customizable timeframe and adjust their use of AWS products accordingly
- Automated logging for API calls and stored logs in CloudWatch Logs to facilitate error handling and detection
- Designed unit tests with over 75% code coverage using JUnit, Mockito, Jest, and ReactTestUtils
- Built frontend with React, TypeScript, and AWSUI, integrated it with the launch information API, and displayed it on the front page of the user-facing website

Cargill

May 2022 – May 2023

Full Stack Software Engineering Intern

- Developed parameterized scripts to grow data observability on internal SQL databases by 500%
- Sped up data validation by 1200x using Python, pandas, NumPy, Matplotlib, and statsmodels
- Designed and implemented Power BI dashboard, and created automated pipeline to transfer environmental data into SharePoint Lists and Power BI

Summer of Side Projects at Illinois

May 2021 – Jun 2022

Outreach Coordinator and Staff

- Conducted outreach to get 400+ student signups for SOSOP and over \$1000 of funding from various companies
- Wrote and edited technical tutorials regarding chatbots, Flask apps, CLI programs, and video games to help students create 100+ side projects

EXTRACURRICULAR INVOLVEMENTS

Rewriting the Code

Apr 2022 - Present

Phoenix Improv Company

Aug 2022 - Present

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, KQL, Python, Java, Kotlin, C++, HTML, CSS

Frameworks & Libraries: .NET, ASP.NET Core, React, AngularJS, Flask, NumPy, pandas

Cloud & Infrastructure: Azure, Azure DevOps, CI/CD, Git, Cosmos DB, DynamoDB, SQL

Testing: xUnit, Jest, vitest, JUnit, Mockito, pytest, Catch2
